WHERE WE SHINE

GAOMEI's state-of-the-art manufacturing facility includes two world-leading automated production lines , a dedicated R&D centre and approx. 200 local employees.

GAOMEI is committed to Quality Management (QA/QC) and Traceability (IQC-FQC).

Vertically integrated, GAOMEI produces up to 80% of equipment components in-house including sheet metal processing, rotational molding production, wire harnessing etc.

Advanced Production & Assembly

WALK-BEHIND SCRUBBERS

A competitive line of affordable and easy-to-use walk-behind floor scrubbers, including cord-electric and battery walk-behind scrubbers.

NEW**GM45B WALK-BEHIND SCRUBBER**

The GM45B is a small-sized walk-behind scrubber dryer designed for quick & easy operation. Its compact design makes it suitable for floor cleaning mid-sized indoor spaces (up to 1,850m²/h) such as retail outlets, hospitals, offices and schools.

Features

- 470mm cleaning path with a 45L wide-angle recovery tank combination
- Single disc pad / brush machine
- Maintenance-free battery (100AH) means continuous run times of up to 3.5 hours
- Quiet Mode – 62-72 dBA operation reduces noise levels allowing for easy cleaning without disruption
- Wide angle recovery tank outlet for easy daily cleaning and maintenance
- Engineered squeegee design for touch-dry water pick-up results
- No tools 'quick-release' system for squeegee changeover
- Splash guard floating skirt included

**GM50 (corded)/GM50B/GM56B/GM56BT WALK-BEHIND SCRUBBERS**

An affordable range of simple-to-use, high-performance single disc pad/brush scrubber-dryers perfect for any commercial application (500-2,000m²).

Features

- 500mm cleaning path / 50L recovery tank combination
- High-quality rotary MALISH branded brush
- Quiet Mode – 62-72 dBA operation reduces noise levels allowing for easy cleaning without disruption
- Maintenance-free battery (100AH) means continuous run times of up to 3.5 hours
- Separate (hot & cold) motor air ducts, enhances service life of the motor
- Powerful (400W) HLM drive motor(GM56BT)
- Engineered squeegee design with an AMETEK rated vacuum motor for touch-dry water pick-up results
- No tools 'quick-release' system for squeegee changeover

GM65RBT CYLINDRICAL BRUSH WALK-BEHIND SCRUBBER

The GM65 RBT cylindrical brush walk-behind scrubber delivers a combination of self-propelled sweeping and scrubbing for application specific surfaces across public spaces, warehouse and distribution centres to industrial manufacturing and processing sites.

Features

- 650mm cylindrical brush cleaning path delivers productivity of up to 2,925m²/h
- 75L capacity (recovery) tank + 4L debris tray
- High-speed brush (650 RPM) for cleaning performance
- Powerful AMETEK vacuum motor for touch-dry water pick-up results
- Operator panel includes battery & run time indicator
- Maintenance-free battery (120AH) means continuous run times of up to 3.0 hours
- Powerful (550W) HLM drive motor for ramp climb capability
- Easy access to brush and housing for maintenance & servicing

GM70BT DUAL-BRUSH WALK-BEHIND SCRUBBER

The GM70BT is a dual disc pad/brush self-propelled scrubber-dryer for professional use in medium-to-large spaces such as retail grocery stores to warehouses (2000-3000m²).

A combined wide cleaning path and large (75L) recovery tank guarantees productivity making it possible to clean more surface in less time. GAOMEI's high-quality suction motor also ensures touch dry water pick-up results.

Features

- Intuitive buttons on panel, easy operation without any special training
- A 700mm cleaning path and large 75L recovery tank combination for enhanced productivity
- High-quality rotary MALISH branded brush
- Maintenance-free battery (120AH) means continuous run times of up to 3.0 hours
- Separate (hot & cold) motor air ducts help enhance service life of the motor

S56B WALK-BEHIND SCRUBBER

The affordable S56B (Pad Assist) is a small (56L) single disc pad/brush walk-behind scrubber-dryer for professional use in small commercial area applications (500-2000m²).

Ideal for hospitals and schools the S56B is one of the most productive small size scrubbers in the range.

Features

- Optimal 560mm cleaning path for productivity
- Solution / recovery tank : 56L/56L
- ECO Mode – achieve an efficient run time of up to 5 hours with reduced water consumption
- Optimal 560mm cleaning path
- Quiet Mode – low 62 dBA operation reduces noise levels allowing for easy cleaning without disruption

S70BT DUAL-BRUSH WALK-BEHIND SCRUBBER

The S70BT is a dual disc pad/brush (self propelled) walk-behind scrubber-dryer for professional use in medium-to-large commercial area applications (2000-3000m²).

Thanks to its numerous features like Eco-mode this professional scrubber-dryer is ideal for a range of floor types and ensures maximum productivity with a large 75L recovery tank allowing you to work continuously and without interruption.

Features

- A 700mm cleaning path and large 75L recovery tank combination for enhanced productivity
- Eco-mode for improved productivity and continuous run times of up to 4.5 hours
- Quiet Mode – low 66 dBA operation reduces noise levels allowing for easy cleaning without disruption
- High-quality rotary MALISH branded brushes
- Maintenance-free battery (120AH) means continuous run times of up to 3.3 hours

RIDE-ON SCRUBBERS

Clean larger spaces in less time
with GAOMEI's professional
ride-on scrubber-dryers

GM-AC MICRO RIDER SCRUBBER

The GM-AC 'Micro' ride-on scrubber-dryer is a dual brush scrubber perfect for cleaning small-to-medium sized spaces (2,000m² – up to 5,000m²) and different floor types.

The small size, turning radius and maneuverability of the GM-AC allows it to work in tight spaces and narrow aisles.

Features

- Single cleaning disc brush improves cleaning efficiency and reduce cleaning management cost
- 560mm cleaning path with single disc pad /brush options
- 60L capacity tank
- Quiet operation (68 dBA) ideal for sites such as hospitals and schools to retail spaces, etc.
- Membrane instrument panel for easy one-touch operation
- Maintenance-free battery (120AH) means continuous run times of up to 3.5 hours
- Powerful (550W) HLM drive motor for ramp climb capability – up to 22% gradeability
- Engineered MWR squeegee design with a 3 stage AMETEK rated vacuum motor for touch-dry water pick-up results
- Quality rotary MALISH branded brush – perfect for uneven floor surfaces

GM-MINI RIDER FLOOR SCRUBBER

The GM-MINI ride-on scrubber-dryer is designed for cleaning medium sized spaces (up to 4,200m²) and different floor types including hard, resin, and porcelain tiles.

Features

- Double-brush, double cleaning disc brushes, improving cleaning efficiency and reducing cleaning management cost
- Intuitive buttons on panel, easy operation without any special training.
- 700mm cleaning path with Single disc pad /Brush options
- 75L capacity (recovery) tank
- Quiet operation (68dBA) ideal for sites such as hospitals, schools and retail spaces, etc.
- Membrane instrument panel for easy one-touch operation
- Maintenance-free battery (150AH) means continuous run times of up to 3.3 hours
- Powerful (400W) HLM drive motor for ramp climb capability
- Engineered MWR squeegee design with a 3 stage AMETEK rated vacuum motor for touch-dry water pick-up results
- Quality rotary MALISH branded brush – perfect for uneven floor surfaces

GM110 BT70 / BT85 RIDER FLOOR SCRUBBER

The GM110 ride-on scrubber-dryer series is designed for cleaning medium-to-large sized spaces (8,000m²- 20,000m²) and different floor types including hard, resin, and porcelain tiles.

Features

- 700mm & 800mm cleaning path with single disc pad /brush options
- 110L capacity (recovery) tank
- Quiet operation (68dBA)
- Easy operator controls
- Maintenance-free battery (220AH) means continuous run times of up to 4.0 hours
- Powerful HY drive wheel (24v, 550w) for ramp climb capability of up to 22%
- Variable transport speed of up to 6km/h
- Automatic squeegee reset system
- 3-stage AMETEK rated vacuum motor for touch-dry water pick-up results
- Quality rotary MALISH branded brush – perfect for uneven floor surfaces

GM130/GM160 INDUSTRIAL RIDER FLOOR SCRUBBERS

The GM130 & 160 ride-on scrubber-dryer are robustly designed for outstanding performance and larger sized facilities (up to 6,560m²).

Features

- 700mm & 800mm cleaning path with cylindrical or disc pad option
- 130L or 160L capacity (recovery) tank option
- Pre-sweep (250mm) side brush option available
- Eco-mode for improved productivity and continuous run times of up to 4.0 hours (GM130) and 6.0 hours (GM160)
- Easy one-touch operation membrane control panel & display
- Powerful ramp climb capability of up to 30%
- Automatic squeegee reset system

GM230 INDUSTRIAL RIDER FLOOR SCRUBBER

The GM230 heavy-duty ride-on scrubber-dryer is engineered for work. A combination of robust features and scrubbing power delivers exceptional performance for large facilities.

Features

- Wide 900mm cleaning path delivers high productivity of up to 8,100m²
- 230L capacity (recovery) tank option
- Cylindrical or disc pad option for different surface types
- Pre-sweep (250mm) side brush option available
- Automatic squeegee reset system
- Eco-mode for improved productivity and continuous run time of up to 6.0 hours
- Compact machine footprint delivers maneuverability with a ramp climb capability of up to 30%
- Easy one-touch operation membrane control panel & LCD display

COMBINATION SWEEPER-SCRUBBERS

Sweep and scrub your
small-to-large indoor
and outdoor floors
in just one pass

GM-RMINI RIDER SWEEPER-SCRUBBER

The GM-RMINI rider scrubber-dryer delivers more productivity with a combination of cylindrical brush sweeping and scrubbing for application specific surfaces across public spaces, warehouse and distribution centres to industrial manufacturing and processing sites.

Features

- 650mm cylindrical brush cleaning path delivers productivity of up to 3,900 m²/h
- 75L capacity (recovery) tank + 4L debris tray
- High-speed brush (650 RPM) for cleaning performance
- Automatic squeegee reset system
- Powerful AMETEK vacuum motor for touch-dry water pick-up results
- Quiet operation (68 dBA)
- Maintenance-free battery (150AH) means continuous run times of up to 3.5 hours
- Powerful (400W) HLM drive motor for ramp climb capability

GM110 BTR80 RIDER SWEEPER-SCRUBBER

The GM-110BT heavy-duty rider scrubber-dryer delivers a combination of cylindrical brush sweeping and scrubbing for application specific surfaces across large public spaces, warehouse and distribution centres to industrial manufacturing and processing sites.

Features

- 800mm cylindrical brush cleaning path delivers productivity of up to 4,800 m²/h
- 125L capacity (solution) tank + 5L debris tray for extended cleaning
- Maintenance-free battery (200AH) for continuous run times of up to 5.5 hours in ECO mode
- High-speed brush (650 RPM) for heavy cleaning performance
- Easy operator controls
- Automatic squeegee reset system
- Powerful AMETEK vacuum motor for touch-dry water pick-up results
- Quiet operation (68 dBA)
- Powerful (500W) HY drive motor for ramp climb capability

SWEEPERS

GAOMEI's professional range of rider sweepers are safe, easy to use and able to satisfy your indoor & outdoor sweeping needs

S1900ED SMART FLOOR RIDER SWEEPER

Engineered for a variety of outdoor sweeping applications such as streets, parks, industrial areas and other public spaces, the S1900ED is built for performance and delivers productive cleaning of up to 19,000 m²/hr.

Features

- 160L dry hopper capacity and 90L water recovery tank
- Large sweeping path with 1,900mm side brush and 800mm main brush
- Equipped with a 6m² filter for dust prevention, and a smart vacuum induction system to for filter cleaning and maintenance
- Self-unloading and hopper dumping system (up to a 200kg loading capacity)
- UV-protected green tempered front glass offering a full 360 degree view
- Powerful ramp climb of up to 30%

GM-MINIS RIDER SWEEPER

The GM-MINIS rider sweeper is perfect for everyday maintenance for small-to-medium facilities and can maneuver safely down narrow aisles yet still clean up 4,200m².

Features

- 600mm main (cylindrical) roller brush perfect for everyday maintenance
- Dual side brush design for pre-sweeping
- Cleaning path 1000mm /600mm (with side brush /without)
- 50L debris hopper capacity
- Integrated front bumper and LED lights
- Maintenance-free battery 150AH (standard) / 200AH (optional)
- Optional OHG (overhead guard) available

S1500/S1500D RIDER SWEEPER

Robust and reliable, the S1500 series sweeper is designed for professional indoor & outdoor sweeping of medium sized industrial spaces.

Features

- 1000mm main (cylindrical) roller brush
- Dual side brushes (standard) for pre-sweeping
- Cleaning path 1500mm/800mm (with side brush /without)
- Delivers productivity of up 15,000m²/h
- Large 160L stainless steel hydraulic dump hopper
- Maintenance-free battery
- Integrated steering wheel (LCD) controls for easy operation
- 1980mm turning radius for maneuverability
- 5.5m² waterproof filter & built-in filter shaker system
- Front bumper and LED lights (standard)
- Electric park brake / Drum brake
- OHG (overhead guard)

S1900/S1900D EXPLORER SERIES

Performance Ready - the S1900 Explorer series is equipped with an extensive range of dust control features designed for professional indoor & outdoor sweeping for larger sized industrial spaces.

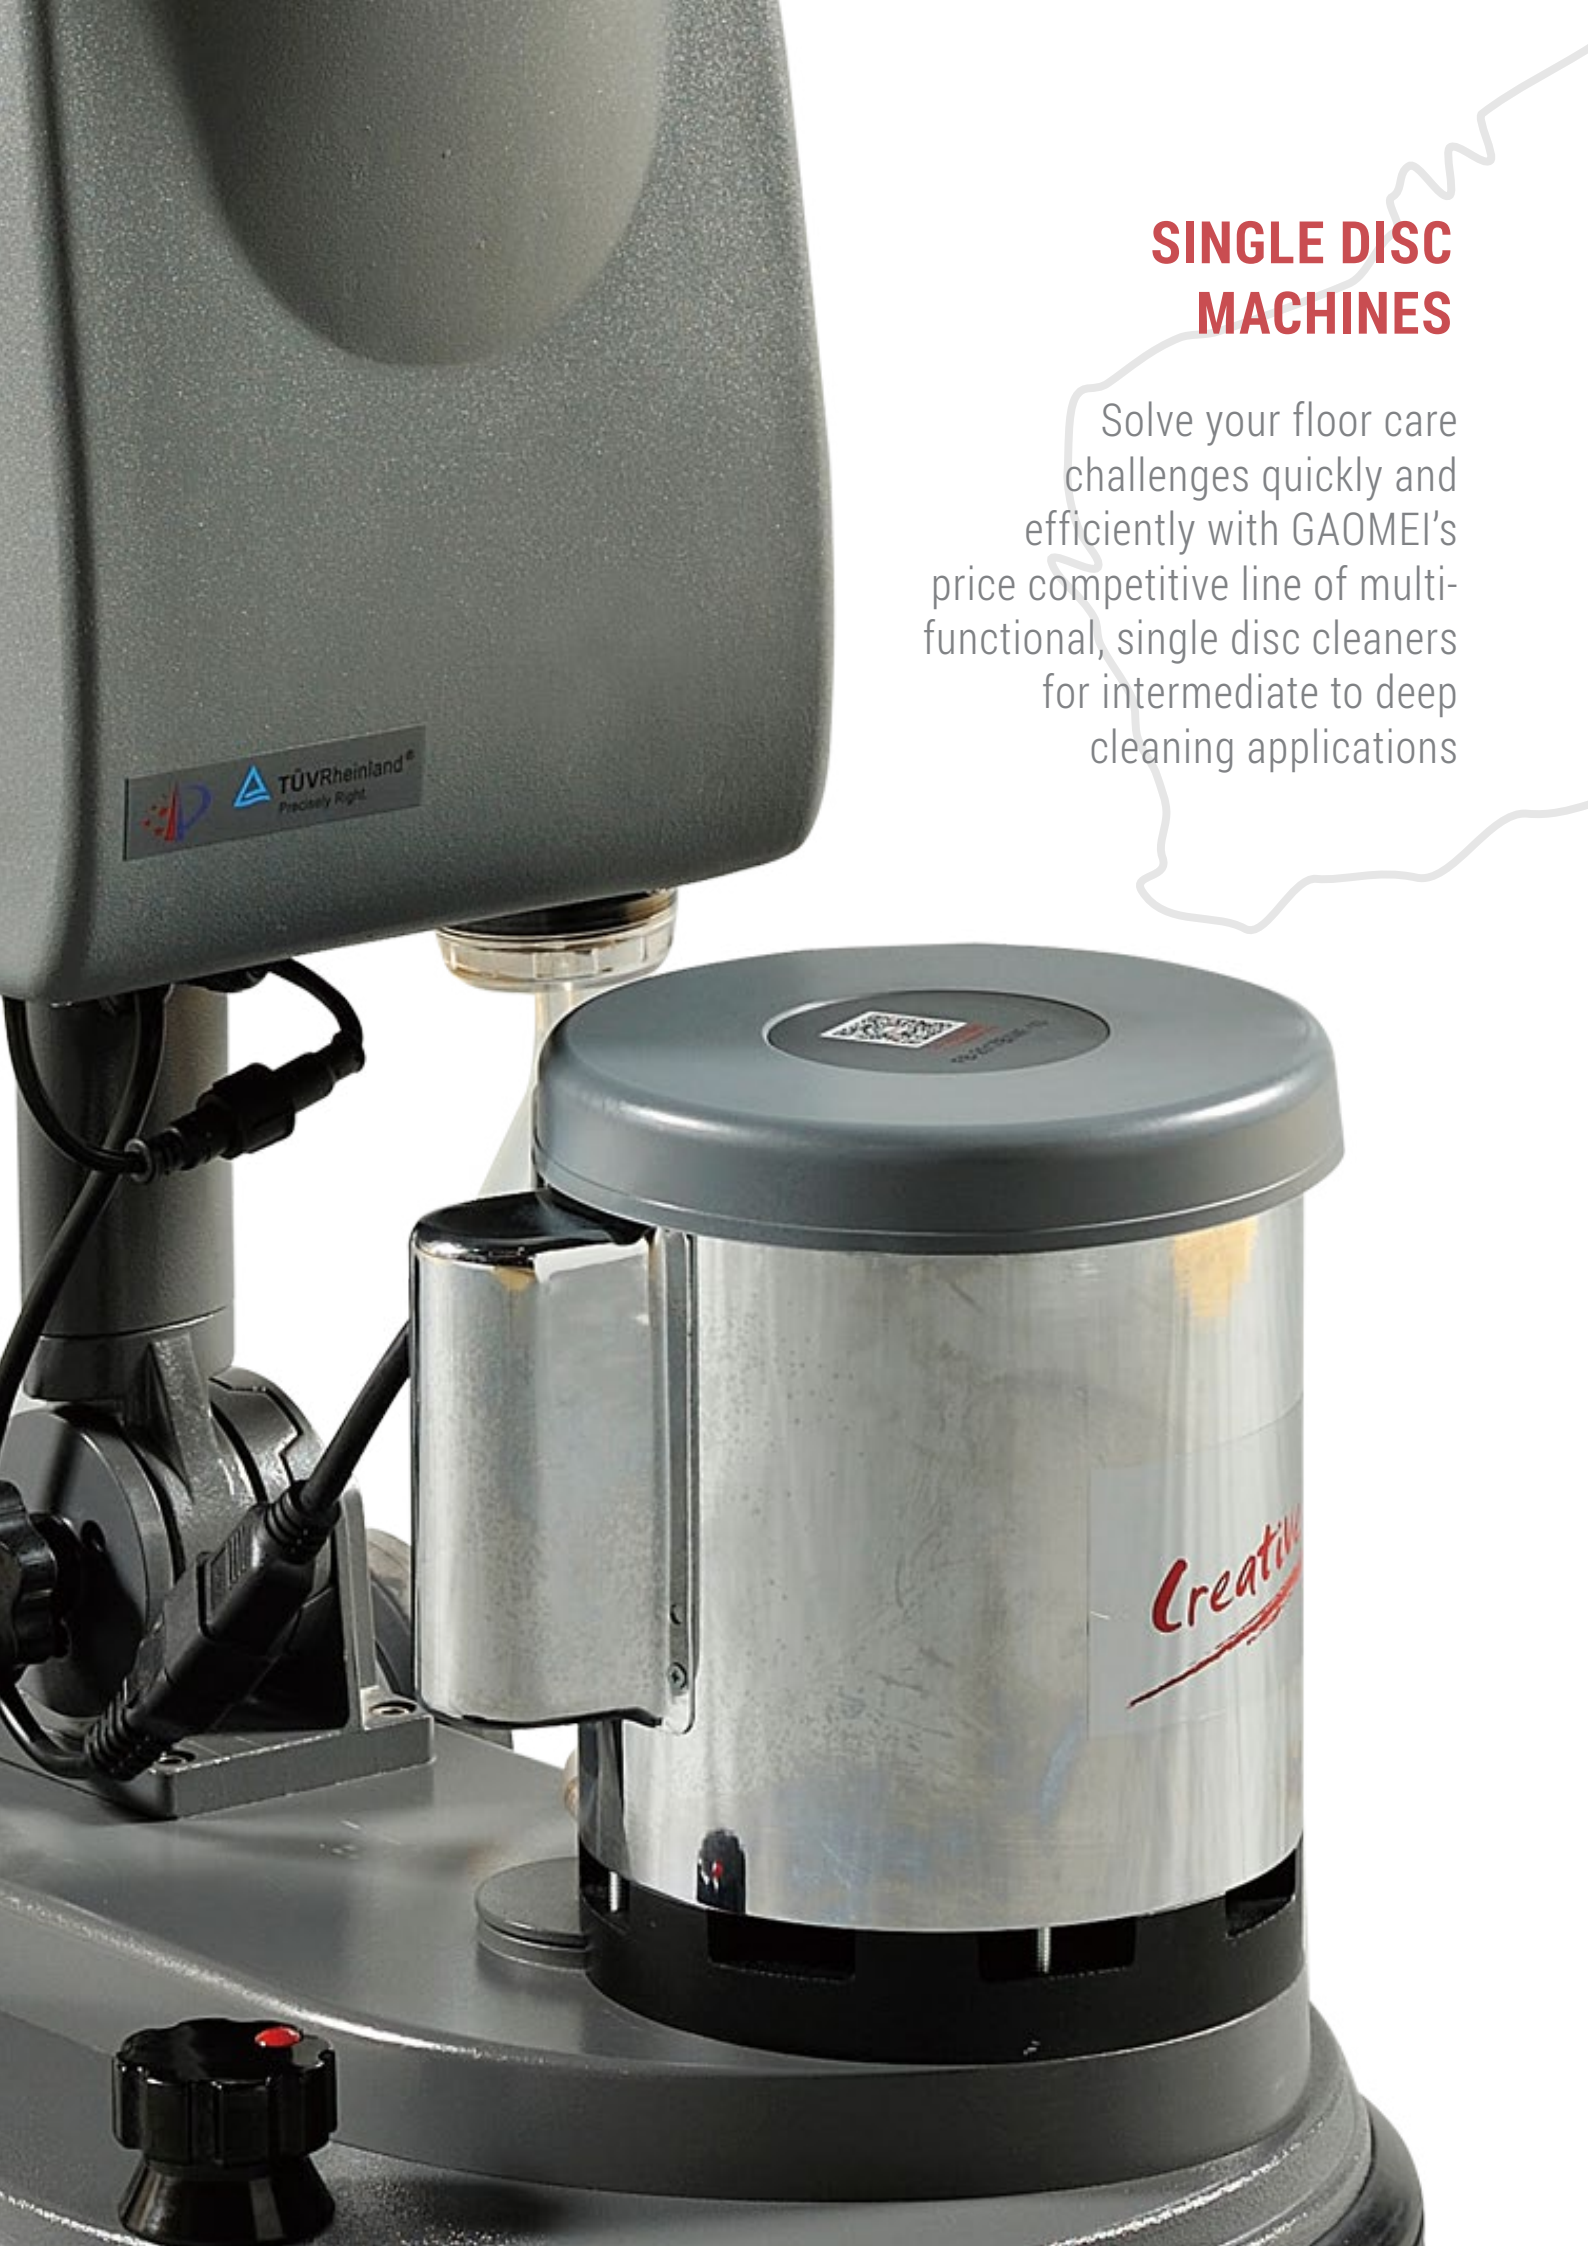

Features

- 800mm main (cylindrical) roller brush
- Quad (tilt enabled) side brush system for performance sweeping (standard)
- Large cleaning path 1900mm/800mm (with x4 side brush /without)
- Delivers productivity of up 19,000m²/h
- Large 160L stainless steel hydraulic dump hopper
- Maintenance-free battery 150AH at 3hr (standard)
- Integrated steering wheel (LCD) controls for easy operation
- 5.5m² waterproof filter & built-in filter shaker system
- Integrated front bumper with LED lights (standard)
- Electric park brake / drum brake
- OHG (overhead guard)
- Optional fully enclosed cab consisting of F-green safety glass with UV protection

SINGLE DISC MACHINES

Solve your floor care challenges quickly and efficiently with GAOMEI's price competitive line of multi-functional, single disc cleaners for intermediate to deep cleaning applications

FB1517/MF10

A low speed machine with a 46 cm brush/pad diameter designed for medium-duty usage across both hard and soft floor applications.

Features

- Quality and performance for less money
- Polishing, scrubbing and stripping for standard cleaning applications of hard floor types (such as parquet, marble, stone)
- Pick up worn in dirt, stains and soils without residue across a range of soft flooring surfaces with an Available foaming generator for rapid-dry cleaning of carpets and soft textiles (optional)
- 10L single solution tank included
- Quiet operation (58 dBA) ideal for hospitals, offices, hotels and public spaces
- All metal casing & disc design
- Detachable base for convenience
- Low maintenance
- Patented drive motor design
- Standard accessories: foam brush, floor brush, pad holder available

FB-2017B/MF10

A low speed machine with a 46 cm brush/pad diameter and more cleaning power designed for both professional wet & dry cleaning applications.

Features

- Quality and performance for less money
- Professional polishing, scrubbing and stripping of hard floor surfaces
- High torque motor and gearbox drive for heavier-duty cleaning jobs
- 10L single solution tank included
- Available foaming generator for rapid-dry cleaning of carpets and soft textiles (optional)
- All metal casing & disc design
- Detachable base for convenience
- Low maintenance
- Patented drive motor design that is offset which means the motor is not in the center of the machine, reducing operator fatigue
- Tailor your machine to the cleaning task at hand with a range of available brush and pad accessories

FC2517

More cleaning power designed for industrial wet & dry cleaning applications.

Features

- Quality and performance for less money
- A heavy-duty single disc machine for industrial polishing, scrubbing and stripping of hard floor surfaces
- High torque motor and gearbox drive for heavier-duty cleaning jobs
- 10L single solution tank included
- All metal casing & disc design
- Detachable base for convenience
- Low maintenance
- Patented drive motor design
- Tailor your machine to the cleaning task at hand with a range of available brush and pad accessories

FC1517 MULTI-FUNCTION FLOOR MACHINE

Designed as a multi-function floor machine for hard and soft flooring. The FC1517 is a great tool for floor waxing, buffing, and polishing hard floors. When used with the dry-powered shampoo brush tool (optional), it doubles as a portable carpet cleaner as well

Features

- Ergonomically designed controls
- An 1100W motor delivers 150 RPM
- 10L solution tank capacity
- Low noise 58dBA operation
- 12m power cord included

WET-DRY VACUUMS

Clean away dirt, spills and water with GAOMEI's affordable line of professional wet-dry vacuums (86L)
All GAOMEI wet-dry vacuums are equipped with high-speed motors

W86 WET-DRY VACUUM

Simple and compact design – 86L capacity tank is ideal for HORECA, offices, education, healthcare to professional auto detailers, warehouses and factories.

Features

- High-speed motor rated up to 1,000 working hours.
- Durable, impact resistant (HDPE) designed tanks
- Quiet performance (77 – 80 dBA) when you need it
- Easy maintenance – washable filter cartridge and filter bag filter help protect against motor damage
- Easy-to-use drainage options – drain hose or tip over trolley system for tank emptying
- Transparent drain hose window for visibility
- Integrated anti-foaming device

V15 VACUUM CLEANER

The V15 is a small, ultra-low noise, multi-stage filter vacuum cleaner, suitable for daily commercial applications for both hard and soft floors.

Features

- 3-stage filtration system
- Powerful suction with a 1200W motor
- Offers up to 1,500 hours motor life
- Low noise 65dBA operation

B-3 PORTABLE BLOWER INDUSTRIAL FAN

Dry carpet, hard floors and other surfaces with this durable and portable blower, with three fan speeds and high output airflow.

Features

Dry areas quickly with this compact, three-speed Blower:

- Dry carpet, hard floors, fresh paint, concrete sealer quickly and efficiently
- Durable rotational-mold body
- Direct air flow where you need it to dry almost any surface
- 750W motor dries surfaces quickly with the fan's three different speeds and up to 110/130/160m³/min
- Three positions for optimal directional airflow
- Dries surfaces quickly with the fan's three different speeds
- Stackable design for convenient storage

CARPET EXTRACTORS

Deliver cleaner carpets! Find the right carpet cleaning solution for your space with GAOMEI's range of professional carpet extractors and spot cleaners

GM-4/5

Remove deep surface stains and odors with the 'swing head' designed carpet extractors providing maximum flexibility to clean small and medium spaces.

Features

- High throughput stainless steel swing brush extraction head
- Hot-water (60°C), high-pressure (160PSI) pump equipped with a 5 nozzle spray head design to dissolve and remove deep soils
- Powerful (2x1400W) 3-stage AMAETEK vacuum motors for fast drying times (up to 2 hrs)
- Pedal operated adjustable handle height for easy operator use
- Impact and crack resistant HDPE tank body for durability

Optional Accessories available:

- Small sized stainless steel spray wand ideal for upholstery spot cleaning
- 2.8m extension hose for up to 8m in total hose length
- 7.5m high-pressure spray hose extension for hard-to-get spaces

GMC-1/GMC-2

Remove surface stains and odors with the range of compact spray-extraction cleaners for small spaces and upholstery spot cleaning.

Features

- 2-in-1 stainless steel spray extractor wand for spot cleaning
- Light and compact carpet cleaner and upholstery spray extractor
- Easy to empty recovery tank for fast turn-around times
- Light, portable tank body with retractable pull rod

GMS-1/GMS-2

Spot clean upholstery and rugs in minutes with a professional dry foam cleaner. The GMS-1 & 2 comes with essential time saving accessories specifically suited for fast drying requirements.

Features

- Dry foam brush for fast drying results in under 2 hours
- Adjustable brush speeds for different textile types (GMS-3)
- Removable recovery tank
- 12V DC motorized cleaning brush head available
- Portable for easy use & transport
