

UR NEXT SWEEPING & SCRUBBING

With a fleet of Tennant machines, old and new, 'Ur Next Sweeping & Scrubbing' can tackle any job

OVERVIEW

Ur Next Sweeping & Scrubbing are a Brisbane based Industrial Cleaning Service Company who pride themselves on being the best industrial scrubbing and sweeping company around. With over 20 years in business, they have exceptional knowledge of the industry and only use machines built for reliability and durability – Tennant. The owner Mo, has been around Tennant machines since he was young and admires not only how good they look but how they perform, day in, day out despite their age.

PROBLEM

As a cleaning solutions provider for a variety of industrial clients, the problems encountered from one week to another vary greatly. From small clean-up sites to a larger construction projects, or a multi-storey carpark contract, Ur Next Sweeping & Scrubbing need to have the right machines on hand all the time. Specializing in road sweeping, warehouse sweeping, hazard spill responses, car park sweeping, scrubbing and emergency responses. The type of client varies from facility managers, property owners, local Governments to commercial and industrial complexes

SOLUTION

In order to be ready and provide the best service Ur Next Sweeping & Scrubbing has a fleet of Tennant machines ranging from commercial to industrial lines:

| Combination Machines | Scrubber- Dryers | Industrial Sweepers: |
|----------------------|---|---|
| M30 & M20 | <i>Walk Behind:</i> T2, T3, T5, T300 and 5700 <i>Ride On:</i> T7, T12, T15, T20 and 7400 | <i>Walk behind:</i> S9 <i>Ride On:</i> 6400 x 4, S20 and S30 x 2 |

Mo explains that "I've dealt with other equipment scrubbers and sweeper but they didn't meet the standard that I require for the job. And the customer service didn't compare with Tennant's – parts availability, consumables, phone service & Service Maintenance in the Queensland area."

Mo also mentions "Being a Service Contractor customers will always inspect the job done so it's important we have reliable machines that will perform time and time again. I'm never worried about the quality of the work performed and I know all the machines are built for Australian standards."

"I've dealt with other equipment scrubbers and sweeper but they didn't meet the standard that I require for the job. And the customer service didn't compare with Tennant's"

CASE STUDY

The reason for having a broad range of machines, especially the sweeper-scrubber combinations like the M30 & M20 works best when there is a site that needs sweeping and scrubbing immediately after one another. It is much more efficient to move one machine rather than the two. It also means that multiple jobs can be completed at one time.

Out of the entire fleet Mo's favourite machine is T20 Industrial Ride on Scrubber-dryer because "it is reliable and looks amazing. The functions are easy to use and maintain. Overall a great machine. It's the Ferrari of the Tennant machinery!" The T20 Industrial Ride on Scrubber is easy to operate and maintain. We use it for the heavy-duty cleaning results and the way that it always improves the facility's image.

Depending on the application, it will change which innovative cleaning technology we apply. All of the machinery in the fleet is equipped with a type of innovation varying between ec-H2O™, ec-H2O NanoClean™ and FAST.

OUTCOME

Ur Next Sweeping & Scrubbing will continue to maintain and use the current Tennant machines they have in their fleet, including the older machines as they still continue to perform. Utilising the planned maintenance and genuine TennantTrue® parts means that their fleet will have the maximum amount of uptime possible

"I've dealt with other equipment scrubbers and sweeper but they didn't meet the standard that I require for the job. And the customer service didn't compare with Tennant's"
