IRIS Asset Manager
Intelligent Insights

IRIS Asset Manager delivers key performance metrics, empowering you with intelligent insights to optimize fleet performance and reduce cost-to-clean.

Take Action on Critical Issues Faster: Push reports and critical alerts show your most important data, so you can take immediate action.

Ensure Cleaning Consistency: Track machine usage for your entire fleet to drive consistent cleaning performance that meets all cleaning requirements.

Increase Productivity: Identify underperforming sites to provide additional training and implement best practices. Ensure optimal battery maintenance and extend battery life to minimize machine downtime.

Optimize Fleet Deployment: See your true usage needs to "right-size" your fleet.

Lower Cost to Clean: Optimize fleet deployment, increase productivity, maximize battery life and minimize battery replacement costs, lowering your overall cost to clean.

Next-Generation IRIS Capabilities
The new IRIS platform and upgraded onboard technology adds several new features:

- **More Intuitive User Interface**
  Redesigned to deliver a cleaner, more intuitive and mobileoptimized user experience — so you can get to the info you need, faster.

- **4G + Wi-fi Connectivity**
  Onboard IRIS telemetry technology now combines 4G connectivity with Wi-Fi to to obtain building level localization even when operating indoors.
