

KEY SWITCH KIT

KIT CONTENTS

P/N.	Description	Qty.
612462	Keyswitch	1

INSTALLATION INSTRUCTIONS:

(Installation Time: 15 min.)

TOOLS REQUIRED: Philips Screwdriver & Wire Cutters

FOR SAFETY: Before installing kit, disconnect positive (+) battery cable from batteries.

NOTE: Follow each step in conjunction with diagram. Each step is clearly labeled on the diagram. For further assistance, refer to the electrical diagram in your operator's manual.

1. Remove four philips head screws from control housing panel to access electrical components.

2. Remove keyhole plug and install key switch. Position key switch face with arrow pointing upwards.
3. From machines wire harness that is bounded with wire ties, locate red accessory wire #44. With wire cutters, snip two wire ties to unbind wire #44 from harness. Be careful not to damage surrounding wires.
4. Disconnect wire #44 from wires #14 and #50. Discard wire #44.
5. Connect wire #14 to the left terminal on keyswitch and wire #50 to opposite terminal.
6. Reinstall panel and reconnect battery cable.
7. Turn key switch on to operate. Main switch must remain on.
