

# INSTRUCTION BULLETIN

No. 2851  
Machine: 140E  
Published: 8-91/01

**NOTE: DO NOT discard Parts List from Instruction Bulletin. Place Parts List in the appropriate place in your machine manual for future reference. Retaining the Parts List will make it easier to reorder individual parts and will save you the cost of ordering an entire kit.**

Installation Instructions for TENNANT Label Kit 02575.

This kit contains parts needed to install labels on the machine listed above. Please follow step-by-step instructions.

*PLEASE NOTE: Labels must be ordered in sets, and cannot be ordered separately.*

## INSTRUCTIONS:

(Refer to Figures 1 2, and 3)

**FOR SAFETY: Before leaving or servicing machine, stop on level surface and set parking brake (if equipped on machine). Then turn off machine and remove key.**

1. Disconnect battery cables from machine.

**WARNING: Always disconnect battery cables from machine before working on electrical components.**

2. Thoroughly clean painted surface with isopropyl alcohol, Prep Sol, Emulso Degreaser or lacquer thinner.

**WARNING: Flammable materials can cause an explosion or fire. Keep flames and sparks away from area.**

- a. Apply cleaning solution to painted surface. Rinse and dry thoroughly.
  - b. **To check for cleanliness:** Spray a fine mist of distilled water on cleaned surface. If water “beads up”, repeat step 2a. If water covers cleaned surface with a uniform film of water, the cleaning operation was done properly.
3. Mark position for label.
  4. Fold label back and pull liner paper from label.

*NOTE: If label is pulled from liner paper the label could tear or break.*

5. Align one edge of label on machine, then press down with your fingers.
6. With a squeegee, work away from attached edge of label using overlapping strokes. Always start at the center or at one corner of label and work toward outer edges to avoid trapping air.
