Installation Instructions for Harness Replacement Kit 08499.

This kit contains new Wire Harness 08158 which combines the old Main Harness 01352 and Instrument Panel Harness 01354 into one harness. Please follow the step-by-step directions.

PROCEDURE:

1. Park the machine on a level surface. Turn off the engine and set the parking brake, if the machine is so equipped.

WARNING: Always turn off the engine and set the parking brake before working on the machine.

2. Disconnect the cables to the battery. Disconnect the negative (-) cable first.

WARNING: Always disconnect the battery cables before working on machine electrical components.

3. To make installation easier, you might want to disconnect the old harness connection by connection, adding the new harness as you go. See Fig. 1 and the Electrical Schematic in the manual to help make connections.
4. When wiring is complete, recheck connections, then reconnect the battery cables.
