PRODUCT(S)
AFFECTED: **Integrity**

SUBJECT: Wiring Update Kit #609157 Now Available.

PURPOSE: To prevent machine failure.

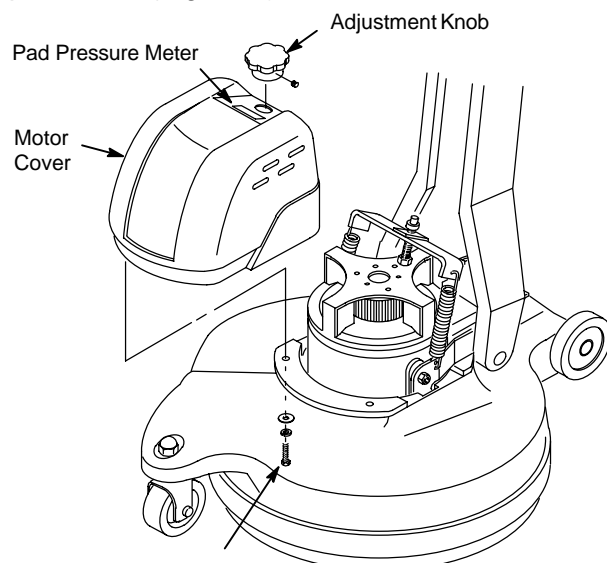

NOTES: This kit is available at no charge, please contact the Castex Customer Service Department.
The kit is required for all Dust Control Burnisher models built before November 1999.

INSTALLATION INSTRUCTIONS:

TOOLS REQUIRED: 7/16", 1/2" Socket Wrench,
3/32" Allen Wrench, Std. & Phillips Screwdriver.

FOR SAFETY: Before installing kit,
disconnect power cord.

1. Unplug machine's power cord from wall outlet.
2. Remove panel from handle to access internal wiring (Figure 1).
3. Replace wire as indicated with new 7.5 inch black wire assembly. Replace handle panel (Figure 1).
4. Lay machine on floor and remove pad driver.
5. Remove motor cover by removing adjustment knob and four motor cover mounting screws from underside of machine (Figure 2).
6. Remove wires that are connected to pad pressure meter and replace them with new wire assemblies as shown (Figure 3).
7. Replace motor cover, adjustment knob and pad driver (Figure 2).

Motor Cover Screws (4)
