

Technical Service Bulletin

MODEL(S) AFFECTED: **T5 and T5e models**

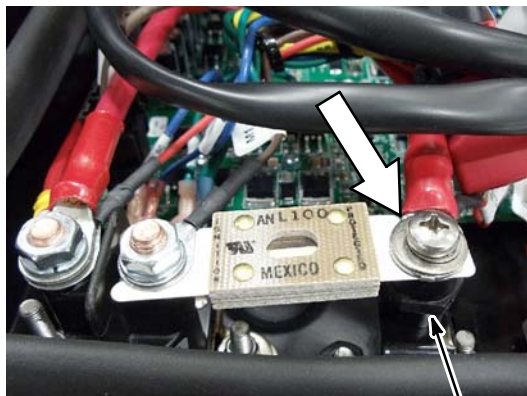

NA and International models manufactured before serial number 10473940 (May 14, 2010)
European models manufactured before serial number T5xxx06108 (May 14, 2010)

SUBJECT: The hardware used to fasten the 100A fuse to the stand-off has changed to ensure a tight fuse connection (see diagrams below).

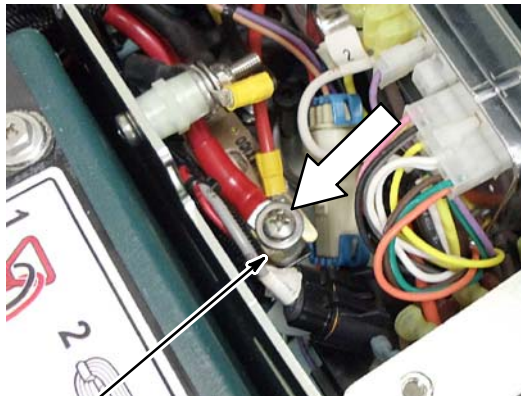

PURPOSE: This change was required because the stand-off may have plastic backfill within the threaded insert causing the screw to bottom out prematurely thus preventing a tight fuse connection.

NOTES: For questions, contact the Tennant Customer Service Department.
Warranty Information: Standard Terms Apply.

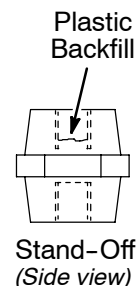

T5 Model

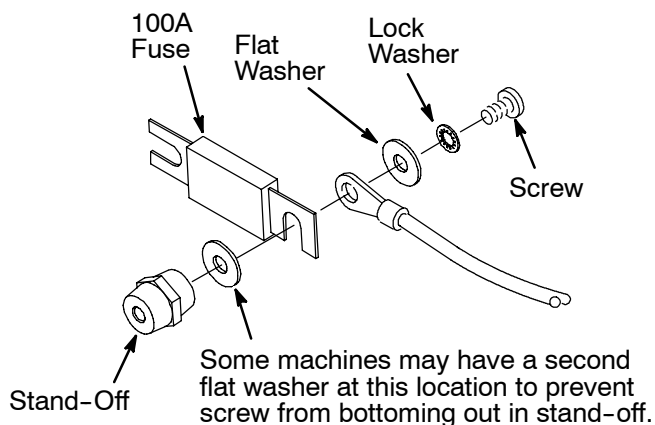

T5e Model

Stand-Off

Machines Manufactured Before May 14, 2010

Machines Manufactured After May 14, 2010
