BUILT TO LAST

The Tennant 2100/2300 series of floor machines and burnishers are workhorses built with rugged durability that ensures years of reliable use.

Ergonomically Perfect

Ergonomic control grips are comfortable and help reduce operator fatigue. Attached to the control grips are dual safety switches to prevent accidents.

An off-center motor position on the 2100 style units perfectly balances the brush torque and allows the operator to clean hard to reach areas such as under kick areas, radiators and furniture. The low noise level allows these units to be operated in sensitive environments such as schools, office buildings and hospitals.

Variety of Options

Add simple options like solution tanks, brushes and pad drives to these Tennant floor machines or customize to suit your needs. Special customizable options include a 5-brush head for structured floors, sanding discs, steel blade scarifiers, steel wool rings and many more.

The 2140 Floor Machine – This heavy duty machine can stand up to even the toughest hard floor challenges.

The 2120 Floor Machine – Ideal for daily hard floor maintenance on a variety of surfaces.

The 2320 Burnisher – Cloth filter bag on the 2320 captures dust particles during operation and virtually eliminates dust mopping after burnishing.

The 2330 Burnisher – This high speed burnisher produces an excellent shine on many floor finishes.

The 2370 Dust Control Burnisher – Perfect for use in noise sensitive environments like retail and educational facilities, office buildings and hospitals.
