

# 2260/2270

## Dual Speed Floor Machines

safety switch

Ergonomic handle and safety triggers increase operator comfort and safety level.

From scrubbing and stripping to spray buffing and polishing, the 2260/2270 dual speed machines can stand up to even the toughest hard floor challenges.

The Tennant 2260/2270 floor machines are work-horses and are designed to be flexible and tough to handle everyday operation.

### Ergonomically Friendly

Easy to activate control grips are comfortable and help reduce operator fatigue by minimizing hand movement during startup and operation. Attached to the control grips are dual safety slide switches to prevent accidents.

### Balanced Operation

An off center motor position on these dual speeds perfectly balances the brush torque and allows the operator to clean hard to reach spots such as under kick areas, radiators and furniture. The low sound level allows this unit to be operated in noise sensitive environments such as schools, office buildings and hospitals.

### Floor Machine Specifications

Model Number	2260	2270
Model type	Dual Speed	Dual Speed
Speed	170/340 rpm	170/340 rpm
Operation width	17 in	20 in
Clearance height	4.5 in	2.5 in
Operation voltage	120V	120V
Rated output	1.5 hp	1.5 hp
Cord length	50 ft	50 ft
Operation weight	90 lbs	93 lbs
Sound level (low speed)	65 dBA	65 dBA
