

CREATING A CLEANER, SAFER, HEALTHIER WORLD.

EQUIPMENT

ATLV[®] 4300

ALL-TERRAIN LITTER VACUUM

- Improves the image and health of your community with superior litter pickup
- Increases productivity by adapting to all terrains
- Ensures operator safety with stable, low-center-of-gravity design

THE **SAFE AND EFFICIENT** SOLUTION FOR ALL-TERRAIN, OUTDOOR SWEEPING

Tennant built the ATL® 4300 to tackle real-world operating conditions. Whether climbing over curbs, navigating hills or cleaning along fence lines, the rugged ATL 4300 delivers. The ATL keeps all your outdoor surfaces clean. From asphalt and concrete to turf and grass, you'll always make a good first impression.

IMPROVE THE IMAGE AND HEALTH OF YOUR COMMUNITY

The high-performance vacuuming power of the ATL, complemented by its long-arm vacuum, allterrain tires and curb climbing ability, keep grassy grounds, parking lots, fence lines and shrub beds free of trash, cigarette butts, bottles and more.

MAXIMISE PRODUCTIVITY

Easy-to-use features require less training time, so operators get out and cleaning more quickly. During operation, a quick peak through canister portholes reveals the debris level in the ATL's unmatched, extra large capacity hopper. Operators effectively clean longer between stops, knowing that the top-mounted vacuum fan continually provides unrestricted airflow. Empties go smoothly with the wide-angle, tilt-out litter tank for easy access debris removal.

RELY ON SAFE, STABLE OPERATION

Clean with confidence knowing that the ATL provides safe, stable operation with its low center of gravity design, highly effective disk brakes and standard rollover protection system.

INSIDE THE ATLV 4300

LONG-LASTING AND DURABLE

A corrosion-resistant polyethylene canister with optional bagless liners, as well as the self-cleaning impeller inlet screen, keeps the ATL V cleaning and looking better longer.

MUST-HAVE OPTIONS

Extend your cleaning reach

Access the vacuum hose for additional cleaning reach with the optional fenceline nozzle.

Control dust

Water assisted dust control configurations help contain air-borne dust.

Make cleaning comfortable

Add a ROPS certified cabin for comfort from the elements.

- A** Four all-terrain tires maximise mobility and minimize ground compaction.
- B** Easy cleanout, quick access, swing out hydraulic cooler.
- C** Debris container uses standard, off-the-shelf trash bags for lower supply costs. Container tilts out for easy cleaning.
- D** Top-mounted vacuum fan design ensures debris will not go through the vacuum fan.

- E** ROPS certified overhead bar provides operator protection from rollovers.
- F** Ergonomic design includes power/tilt steering and the easy-access vacuum hose.
- G** Adjustable vacuum hose can be repositioned for easy litter pick up.
- H** High ground clearance accommodates uneven terrain and street curbs.

ENVIRONMENTAL STEWARDSHIP

ec-H2O and FaST technologies are NFSI (National Floor Safety Institute) Certified. NFSI certification ensures a product has passed a 2-phase testing process, proving the floor product helps to reduce potential for slip-and-fall accidents.

ec-H2O and FaST technologies are registered by NSF International. NSF International is an independent, not-for-profit organisation that ensures formulation and labels on these products meet appropriate food safety regulations.

Tennant FaST 365 and FaST 965 detergents have been awarded the European Eco-label.

This proves that our Tennant FaST® detergents have a reduced environmental impact compared to standard detergents

ec-H2O™ technology won the European Business Award 2009

for the Business Innovation of the Year, one of the most prestigious business awards. The European Business Awards (www.businessawardseurope.com) is an independent awards programme designed to recognise and promote excellence, best practice and innovation in the European business community.

Conserve Resources
