

SENTINEL® SWEEPER HELPS KEEP MEDICAL CENTER GROUNDS CLEAN AND SAFE

A large medical center in the Midwest is dedicated to providing exceptional health care that improves patients' health. The medical center provides more than 200,000 visits annually through an extensive outpatient program.

APPEARANCE IS EVERYTHING

Keeping the extensive medical center grounds clean, safe and inviting for patients, visitors and staff is a big job – and employees take it seriously. Staff members rely on their Sentinel high-performance outdoor sweeper to help keep streets and outdoor areas clear of leaves, dirt, dust and debris.

Appearance is everything for the medical center's patients and visitors, and employees try to keep the grounds as clean as possible. Nearly constant construction results in contractors bringing in dirt that needs to be cleaned afterwards.

The grounds crew appreciates the cleaning results their Sentinel sweeper provides. Once a week throughout spring, summer and fall they use it all day to pick up dirt, leaves and debris. The sweeper also is used more frequently to meet their specific cleaning needs.

The medical center's previous sweeper was ineffective and caused a lot of problems. It didn't pick up debris well, blew dust out the bottom, and the suction tube didn't work very well.

EASY MAINTENANCE

Five years ago, the medical center purchased a new Sentinel sweeper and officials have been very pleased with the easy maintenance and excellent cleaning performance it provides.

Staff members perform most of the maintenance for the Sentinel themselves because it's easy. The Sentinel does an excellent job when their operators keep it clean – dumping and washing it after every use. They also perform regular inspections to keep it running smoothly.

When the Sentinel needs help beyond what the employees can do, a Tennant service representative comes out and provides good service. In addition, Tennant service staff members are a phone call away, which is helpful when they have a question and don't need a technician to come out.

The Sentinel does a good job keeping the grounds clean and safe, and staff members receive compliments from visitors that the grounds look nice. Staff members are pleased with their Sentinel sweeper because they know it's reliable and it works well for their purpose.
