

PATENT PENDING

Sonic Scrub brushes

Designed to outlast floor pads, saving you time and money.

- Improve cleaning efficiency and reduce costs to clean
- Easily clean a wide range of floor types
- Easily remove and install replacement brushes

WHAT IS SONIC SCRUB?

SONIC SCRUB is a light weight, deep cleaning, rectangular brush designed for the oscillating floor machine industry. The red brush is tufted with polypropylene (.040" diameter) and durable 6/12 nylon (.016" diameter) filament. The green brush is tufted with polypropylene (.040" diameter) and durable 6/6 nylon (.022") filament.

- Designed to clean deep grout lines & uneven floor surfaces
- Dual filament construction combined to create a superior scrubbing action for deep cleaning
- Flared tufting for edge-to-edge and corner-to-corner cleaning
- Driver block is not required allowing for simple and quick change out time
- Universal design fits all oscillating floor machines; stick, walk behind, and riders
- Cleans with water or cleaning solutions
- PATENT PENDING

FLOOR TYPES

Created for VCT, ceramic, quarry, concrete and terrazzo floors to clean deep grout lines and uneven floors.

LIFE EXPECTANCY

Test data shows that the Sonic Scrub brush will significantly outlast pads.

MACHINE APPLICATIONS

SONIC SCRUB fits all 14" x 20" oscillating floor machines including stick, walk-behind, and riders.

EASY INSTALLATION AND REMOVAL

To install, simply align and press the light weight hook-and-loop backed brush onto the machine's drive plate, engaging the hook-and-loop material. To remove, simply pull the pre-molded brush tabs.

FEATURES

- Low noise (db) level
- Outstanding scrubbing action on high & low RPM machines
- Light weight
- Easy to clean
- Cleans corners and edges
- Hook & loop backing
- Built-in tabs for easy removal
- Quick-change design
